Slaughter Pig Marketing Summary

This week

The market was in full "January mode" this week with processors sticking rigidly to contracted numbers (or less) and not looking for any extras. Factory reliability in the week proceeding the trading week was poor, and this enhanced supply as a consequence. Normal supply improved slightly but there were still comments from producers that pig growth had slowed down due the colder weather. Prices eased back with some contact contributions down a penny. The fresh meat market was very quiet, as expected for this time of year, and prices fell 1p to 2p on average. There was good competition from the cull sow exporters, and price falls were limited to 1p or so. European markets were a sea of red with the influential German market down 3 eurocents, and its near neighbours seeing equal or greater falls. The Euro strengthened slightly against sterling, and ended the week up 0.1p at 88.98p.

Weaner Marketing Summary

w/c 07/01/18

Trade remained very quiet with minimal demand for any offerings outside contract arrangements. Supply was ample and some batches remained unsold. The prices announced by the AHDB saw no quote for 30kgs due to a small sample size and the weighted average for a 7kg fall by £2.04 to £38.13.
